

Customer On-Boarding Information

Dear Fellow Restaurateur:

Thank you for visiting The Jolly App website. We appreciate your interest in our totally new approach to connecting you with more customers! If you haven't already, please browse through the For Businesses section of the website, as it contains answers to many of the questions restaurant owners are asking.

We will begin onboarding restaurants in Deschutes County, Oregon on October 16th, 2023. If you are in this geographic area, you will receive an email introduction and invitation to claim your restaurant using the Claim Your Restaurant button on The Jolly App home page.

We are launching initially here in Deschutes County. On-boarding is free, and you will be given 30 days to complete that process before we go live with the App on both the Apple and Google App stores.

After The Jolly App has been uploaded to the App stores and mobile device users begin to download it, register, and begin to search for their own personalized restaurant experiences, the process of collecting data begins. While it will obviously take some time to collect user search data and the resulting analytics that you can use to connect with more customers, we will start sharing user search data 30 days after the initial release to mobile users. After that, the data will continue to grow and provide more and more useful data to all our on-boarded restaurants.

We seek to help every restaurant, large and small, to bring in more customers, keep them and provide reliable real time data that helps both restaurants and customers have better experiences.

Thank you,
The Jolly App On-Boarding Team
